

Elysian Fields Specialty Florals ~ Custom and Unique Designs with your budget

Description:

A unique experience unlike traditional shops. Our designers are artists that translate your ideas into captivating designs your guests will notice. We are not the typical shop with A-B-C designs, your floral creations are designed & created & not copied.

Elysian Fields Specialty Florals is a floral shop where you will find the most amazing design team, we listen to what you want and we create the look just for you.

The best way to create a breathtaking wedding is to base your ideas on color and quality rather than specific blooms. All fresh floral product is imported and there are times a specific variety will arrive and not be the best quality. Using color will allow us the best options to create the desired look. We meet with all of our clients and discuss at length the likes and dislikes of style and blooms to better understand what you want designed.

When you schedule your free consultation with us, please bring any photos or color swatches
